

## **Ahearn & Soper, Inc. Announces Availability of proVision WMS 2.0**

*Toronto— January 30, 2017—* Ahearn & Soper, Inc., a leader in supply chain software and hardware solutions, today announced the immediate availability of proVision Warehouse Management System Version 2.0., with enhanced features for increased warehouse optimization.

“The current enhancements to our warehouse management system software highlights our commitment to deliver a superior product that will eliminate errors in the warehouse and give managers the ability to focus on other aspects of their businesses,” said Paul Pope, VP & General Manager, Ahearn & Soper Inc. “Our goal is to help our customers run smooth warehouse operations and experience higher productivity and greater efficiencies,” he added.

Some of the new features offered in Version 2.0 include advanced inventory allocation which allows managers to allocate or reallocate inventory between orders using a single view; Proof of Delivery (POD) with signature capture which uses portable data collectors to confirm shipment deliveries and record customer’s signature as proof of delivery; and Windows-based Tablet PC functionality which utilizes a touch-screen for various functions.

### **About Ahearn & Soper Inc.**

Since 1975, Ahearn & Soper has provided barcode software and hardware solutions that improve accuracy, tracking, and efficiency within distribution and manufacturing operations. More than 20,000 customers have improved their productivity and quality through the use of barcoding with the help of Ahearn & Soper software, products, supplies, or services. Ahearn’s off the shelf Provision WMS solutions enable distribution centers and Third Party Logistics (3PL’s) companies to rapidly improve warehouse operations and meet the growing demands of customers at lower cost. Ahearn & Soper is a Microsoft gold certified partner and has over 25 years of experience in the development and deployment of Microsoft based logistics software. Every total solution delivered by Ahearn & Soper includes consultation, project management, integration, customization, training, and after sale service. The company is headquartered in Toronto, Ontario, and operates across North America from branch sales and service offices.
